

“ FLOWTRONICS “ Measuring and beyond: Measurement in every application is important for the process optimization, safety and environmental protection and that is the reason behind the establishment of FLOWTRONICS. We as a manufacturer can offer wide varieties of flow & level measuring technologies/principles-based instruments with excellent after sales services, as a single technology cannot satisfy the measurement needs of industrial and commercial applications. Being a one stop solution provider for all your flow & level entire measurement and instrumentation needs, FLOWTRONICS is committed to provide an advanced, state-of-the-art renewable solutions that are committed to satisfy even the most unique and specific needs of the global customers.

FLOWTRONICS has been always engaged in sourcing and supplying the right products for our customers with much experience, we fully understand our clients’ needs. To meet and exceed customers expectations, FLOWTRONICS 100% try our best to make it right.

FLOWTRONICS is been equipped with advanced design capabilities and has piled up a wealth of field application experience, which lays a solid foundation for the commitment to the promotion and innovation of high-tech system solution. The company has devoted to the production of flow/level measurement instruments with superior performance, high stability and strong reliability. Best quality products with the best service is our motto, this helps in making the instrumentation and measuring technology selection, purchase, installation and operation easy for our valued customers.

The our cooperation manufacturers have R&D and industry product development. Each product go with ISO standard and have the flexible manufacturing capabilities. We insist on giving the high quality, reliable products, reasonable price and industry solutions for our customers.

We understand that the path to energy sustainability is a journey and not an event, managing energy costs and usage is the key to long-term achievement and a major part of virtue in every organization's operational budget. FLOWTRONICS products are developed and designed in line with today's need of energy optimization.

Types of products provided by FLOWTRONICS are , **Electromagnetic flow meter , Paddle wheel flow meter , Turbine flow meter , Orifice type flow meter ,Vortex flow meter , Ultrasonic flow meter , Oval gear flow meter , Differential pressure transmitter , Capacitance level transmitter , Magnetic float level transmitter , RF level switch , Vibrating fork level switch , Conductivity Level switch , Magnetic float level switch , Paddle wheel level switch , PH Sensor , Flow Totalizer Etc.**

Please give us your inquiry, we will provide the high standard quality, good delivering and highest level service. Let’s shake hands and work together.

Company Values and corporate culture: Honesty, Fast, Openness, Trust, Respect, Gratefulness, Modesty, Courage and Responsibility.
